1. Returns are calculated using time-weighted methodology (Modified Dietz) with geometric linking as required by GIPS. (#18)
2. Gross returns are presented before management fees but after trading costs. Net returns are calculated by deducting the highest applicable fee (1.00% annually). (#7, #8)
3. The benchmark (S&P; 500) is a market-cap weighted index with dividends reinvested. (#9)
4. Number of portfolios represents accounts in the composite at year-end. For years with 5 or fewer portfolios, internal dispersion is not statistically meaningful. (#10)
